Our App

for Basic Income

Link**berry**

Built in the Cardano blockchain

1. Goal of Linkberry

Linkberry app is for basic income meeting basic human needs.

Earning just a few tens of dollars a month can be life-changing for individuals with limited income. Many of these individuals reside in underdeveloped regions of Africa, Latin America, and Asia, where income levels often fail to meet basic human needs.

Linkberry empowers individuals in underdeveloped regions by offering a monetized methods that generate income.

Linkberry

For Basic Income

1. Goal of Linkberry

## Linkberry helps

- Users **have monetized social media.**

- Users **be influencers.**

- Users **have minimum living wage.**

- People **connect each other.**

- Cardano ecosystem **have over hundreds million active users.**

Linkberry

For Basic Income
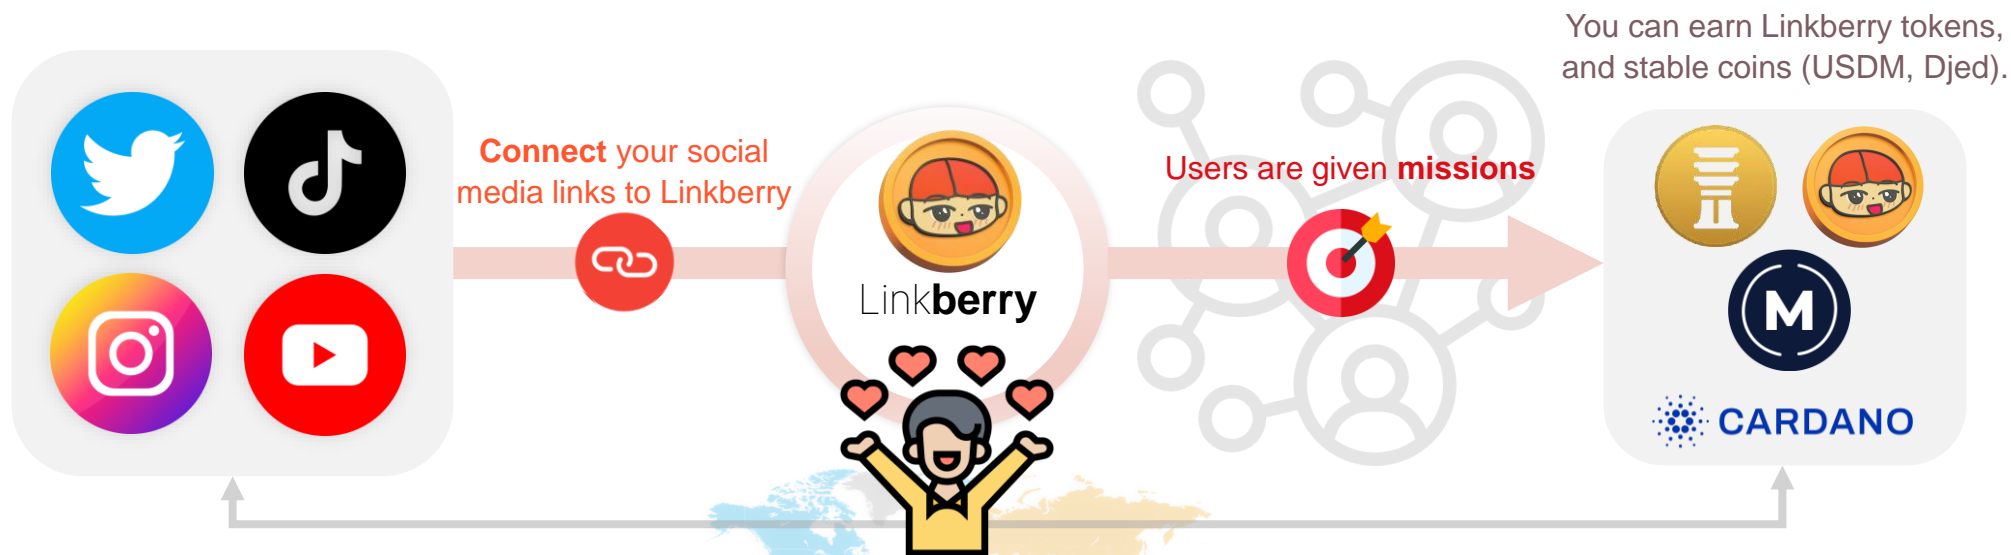

2. How it works?

Connect your X, YouTube, Instagram, TikTok, and other social accounts to Linkberry.

Then, Linkberry shares your social media content with its extensive user base.

Users are given missions, such as subscribing, viewing, and liking content.

Completing these missions earns users Linkberry Tokens, and stable coins (USDM, Djed, etc)

You can earn Linkberry tokens, and stable coins (USDM, Djed).

Connect your social media links to Linkberry

Link**berry**

Users are given **missions**

CARDANO

Support to monetized

- Emerging and Developing economies
- Least developed countries
  (regions of Africa, Latin America, and Asia)

2. How it works?

Linkberry app will consist of two systems (Pumasi & Video).

◆ **Link users (Pumasi)**

◆ **Video (Clip) Social media**
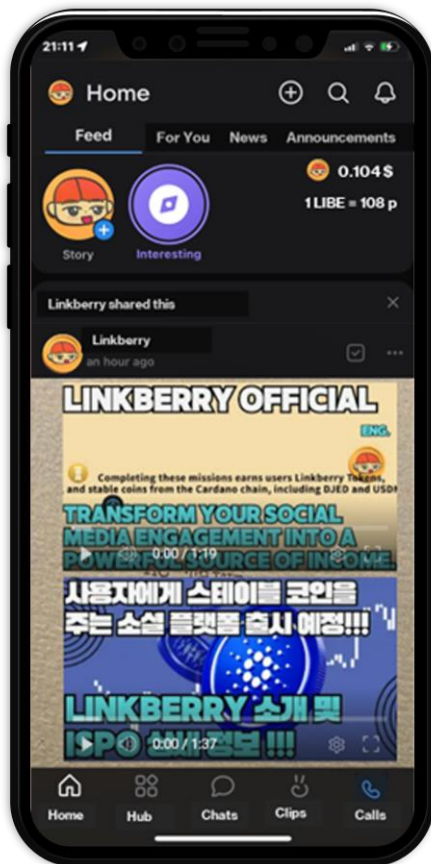

- Your assets
- Your missions
- Link users` Social media links

Linkberry`s own creative UI will be designed & veloped.

5. Tokenomics

How we increase the value of tokens?

1. Linkberry App users in countries that regulate cryptocurrency will be given online gift certificates instead of token rewards to **minimize the amount of tokens in circulation.**
2. Linkberry will **buy back** Linkberry tokens and **burn** them with over 50% of net income of Linkberry App.

Buy back → **Link**berry → Burn(50%)

Linkberry

For Basic Income

6. How you can get tokens?

1 DEX & CEX	2 Reward for your Activities in Linkberry Apps	3 ISPO	4 Ambassador	5 Reward for your Private Donation	6 Airdrop
5. Proof of Donation - If you submit proof of donation (for example, receipts issued by a public institution where you donated), you will receive Linkberry tokens in proportion to the donation amount.
(For only People of Republic of Korea)

6. Airdrop – Community members in X, Discord, Youtube & Kakao talk

8. RoadMap

Linkberry`s ultimate goal is to receive the Nobel Peace Prize for providing basic income to everyone in the world.

Q1
- Beta test
- Offline ambassador program in korea
- Alpha test

Q2
- **Linkberry App launch**
- **Connecting Cardano Wallet**

Q3
- End of ISPO in Linkberry pool
- Rewards to Participants in ISPO
- LBE in DEX
- CEX Listing

Q4
- **100,000 Users**
- **Buy back and Burn tokens**

H1
- Ideation Linkberry Project

H2
- Team building

2023	2024	2025	2026	2040

Q1
- Web site open

Q2
- Complete Tokenomics, Roadmap and White paper

Q3
- Start of ISPO in LInkberry pool and partner pools
- Online ambassador programing
- Starting development of LInkberry App

Q4
- End of ISPO in partner pools

H1
- Token distributions of USDM & LINKEto Participants of ISPO in Linkberry pool

H2
- **1,000,000 Users**
- **Buy back and Burn LINKE tokens**

- Nobel Piece Prize

Link**berry**

For Basic Income

While an app that provides $1 income a day has strong potential to be successful in underdeveloped regions, its success will depend on addressing the challenges related to infrastructure, market penetration, cultural relevance, and regulatory compliance. Tailoring the app to meet the specific needs of the target audience and building strong local partnerships will be key strategies for success.

Economic Impact		Market Penetration		Operational Challenges	
1 Income Boost	**2** Poverty Alleviation	**3** Smartphone Penetration	**4** Digital Literacy	**5** Infrastructure	**6** Security Concerns
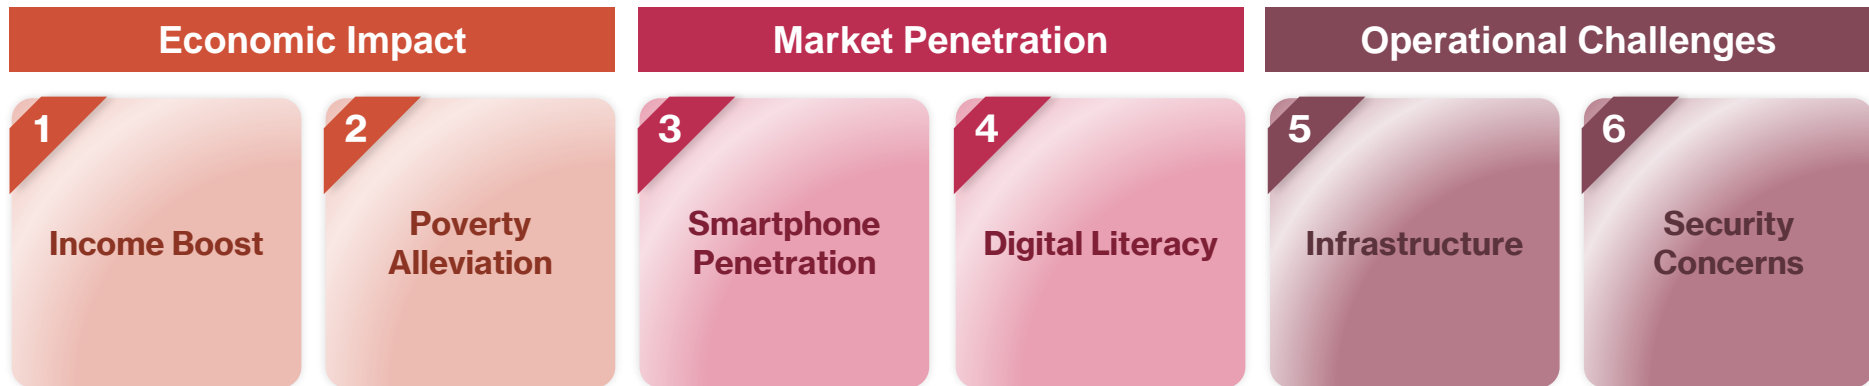

1 In many underdeveloped regions, $1 a day can substantially supplement incomes, providing essential support for food, education, healthcare, and other necessities.

2 In countries where many people live below the poverty line, an additional $1 a day can lift individuals and families out of extreme poverty.

3 Success depends on the penetration rate of smartphones and internet access in these regions. While smartphone usage is growing rapidly, there are still significant gaps, especially in rural areas.

4 Users must have the digital literacy to effectively use the app. Training or an intuitive user interface can help mitigate this barrier.

5 Reliable internet and electricity are crucial for app functionality. In areas with poor infrastructure, the app's usability could be limited.

6 Ensuring the app's security to protect users' personal and financial information is vital to build trust and ensure widespread adoption.

Link**berry**

For Basic Income

While an app that provides $1 income a day has strong potential to be successful in underdeveloped regions, its success will depend on addressing the challenges related to infrastructure, market penetration, cultural relevance, and regulatory compliance. Tailoring the app to meet the specific needs of the target audience and building strong local partnerships will be key strategies for success.

Cultural and Social Factors		Competitive Landscape		Examples and Case Studies
1 Local Relevance	**2** Community Trust	**3** Existing Solutions	**4** Regulatory Environment	**5** Case Studies

1 The app's features must be tailored to meet the specific needs and preferences of users in different regions. Localization in terms of language, design, and functionality is essential.

2 Building trust within communities can facilitate faster adoption. This may involve partnerships with local organizations or influencers.

3 The app must differentiate itself from existing solutions that provide similar benefits, whether they are other apps, local micro-jobs, or aid programs.

4 Compliance with local regulations and understanding the legal landscape in different countries is necessary for smooth operations.

5 There have been successful initiatives like m-Pesa in Kenya, which significantly improved financial inclusion through mobile technology. Learning from such success stories can provide valuable insights.
